Le Parfait has been made in the heart of France since 1930

Le Parfait is the glassware of choice for discerning canning enthusiasts. Bright, clear and strong, the jars are made of high-quality glass and designed to last generations. In five distinct styles, Le Parfait brings unequaled quality to canning and storage. From the iconic wire bail and orange ring to two-piece screw-top lids, Le Parfait jars offer modern interpretations of vintage designs.

Food manufacturers and home cooks alike will find that Le Parfait glassware complements jams and jellies, pickles and chutneys, dried fruit and nuts or even sweet treats,

bringing bold style to homemade and commercially produced products. Outside of the kitchen, they work equally well for bath and body products, such as creams and lotions, bath salts, as well as home products, like candles or potpourri. Each jar is deeply embossed with the Le Parfait name, leaving plenty of room for future labeling, so customers will know the quality of both the contents and

their packaging. From bulk commercial pallets to custom quantities by the case, Down To Earth Distributors will customize orders to fit your needs.

*Le Parfait
means
"the perfect"*

With a name known for quality, Le Parfait is a bright, beautiful alternative to standard canning and storage jars.

Le Parfaits glassware is designed to fit the storage and canning needs of both the home cook and the commercial producer.

Super Terrines

- Clear glass
- Gaskets included

LE PARFAIT SUPER TERRINES

The classic Le Parfait canning jar, the Super Terrine offers clean, French design. The jar features the easy-to-use construction of a hinged, bail lid, and the terrine has straight sides that taper slightly at the bottom. The jar beautifully displays the contents inside, and the large mouth allows for easy filling. The wide lid and smaller footprint allow easy stacking for storage. The Super Terrine has been sought after by cooks, collectors and restaurateurs for the simple elegance it brings to both preserved food and as a storage container.

*Love the
original, not
the imitation*

The Super Terrine uses the iconic wire bail and the often imitated, but never duplicated, famous orange rubber seal, so you can feel good in your preservation. This system keeps the contents air tight, which means a long-term shelf life. For general storing, it opens easily and closes tightly, keeping contents secure.

Gaskets are made of a natural material and cannot be reused. Displaying or storing gaskets on Le Parfait jars may damage them for canning purposes. Jars are shipped with a paper seal and the gaskets inside for their protection.

The Super Terrine's shape and sizes are good for pates, layered terrines and potted desserts. As well, the terrine can be used like a standard canning jar for soups or sauces, pickled vegetables, olives, salsas, baby food, seeds and nuts, spice and salt mixes, compound butters, ground or whole bean coffee.

The jar's design also makes it a decorative element for non-canning needs. Use it as a gift container for sweets and nuts or a base for candles.

Super Jars

- Clear glass
- Gaskets included

LE PARFAIT SUPER JARS

The Super Jar is an upscale take on the standard canning jar, offering the versatility of a rounded shape and Le Parfait's clean design.

With the solid, easy construction of a hinged, bail lid, the jar features a large mouth and concave neck that makes filling and storing preserves with ease, so you don't have to worry about spilling sauces or pickled vegetables after the jar is opened.

The bright, clear glass beautifully displays the contents inside, and the wide lid allows easy stacking for storage.

Built for quality, the Super Jar

uses the iconic wire bail and the often imitated, but never duplicated, famous orange rubber seal, so you can feel good in your preservation.

This system keeps the contents air tight, which means a long-term shelf life. For general storing, it opens easily and closes tightly, keeping contents secure.

Le Parfait gaskets are made of a natural material and cannot be reused for heat treating. Displaying

or storing gaskets on Le Parfait jars may damage them for canning purposes. Jars are shipped with a paper seal and the gaskets inside for their protection.

*Take your
canning game
up a notch*

The Super Jar's shape and sizes are good for soups or sauces, cut and whole pickles and vegetables, crushed tomatoes and fruits, olives, salsas, baby food, seeds and nuts, spice and salt mixes, compound butters, ground or whole bean coffee.

The jar's design also makes it a decorative element for non-canning needs. Use it as a gift container for sweets and nuts or a base for candles.

Familia Wiss Terrines

- Clear glass
- Metal lids and caps included

LE PARFAIT FAMILIA WISS TERRINES

Hearty and cleanly designed to last for generations, the Familia Wiss Terrine is a uniquely French take on the ubiquitous canning jar. Instead of the standard, round bottle design of other jars, the terrine has straight sides that taper slightly at the bottom, which allows for easy removal of preserved goods. The bright, clear glass beautifully displays the contents inside, and the wide mouth allows for quick filling and storing preserves with ease.

Familia Wiss is built for heavy-duty canning. Featuring thick, durable glass, the terrine's wide lid

and bottom allow for better stacking and storage in the cupboard, unlike standard canning jars.

The Familia Wiss uses a two-part sealing cap and full lid that ensure a tight seal the first time for a long-term shelf life. The full lid means you don't have to worry about handling the cap once your canned goods have been opened and stored in the refrigerator, allowing for easier use and a cleaner presentation.

Like classic jars, sealing caps cannot be reused for heat treatment and must be replaced once the original seal is broken.

*Stand
apart from
ordinary jars*

The shape is good for individual pates, layered terrines and potted desserts. As well, the terrine can be used like a standard canning jar for individual soups or sauces, cut pickles and vegetables, crushed tomatoes and fruits, olives, salsas, baby food, spice and salt mixes, compound butters, ground or whole bean coffee.

The jar's design also makes it a decorative element for non-canning needs. Use it as a gift container for sweets and nuts or a base for candles.

Jam Jars

- Clear glass
- Metal lids included

Jam Pots

- Clear glass

LE PARFAIT JAM JARS AND JAM POTS

The Le Parfait Jam Jar and the Le Parfait Jam Pot give homemade jams and jellies the distinguishing touch they deserve. In two styles, one designed for canning and one for short preservation, the jar and pot give jams and jellies a table-ready appearance.

The vintage design calls back to early Twentieth Century France, but it will bring back your childhood at the breakfast table, too, when empty Jam Jars became juice glasses. Faceted sides visually separate these jars from other containers while allowing for easy handling.

On the Jam Jar, the pen-and-ink inspired screw-top lid reminds you that the contents are "Home Made" while the presentation is anything but. Designed for canning, the lid must be replaced each time for heat treating but can be used to seal for short-term storage

The Jam Pot has a smooth lip for easy drinking and cannot be used with a sealing lid, making it great as a working glass in the kitchen.

Bright orange rubber caps are sold separately, allowing you to use these Jam Pots for quick preserves that need short-term storage and no heat treatment.

*Because jam
is hungry for
its own jar*

The Jam Jars' shapes and sizes are good for both small and family-sized batches of jams, jellies and marmalades, but they can be used as fun alternatives to standard canning jars for salsas and chutneys.

The Jam Pot makes an attractive working glass, perfect for juice, table wine and cocktails, and with the optional lid, it stores refrigerated preserves with ease.

Screw-Top Jar with Plastic Lids

- Clear glass
- BPA-free plastic lids included

Screw-Top Jar with Metal Lids

- Clear glass
- Metal lids included

LE PARFAIT SCREW-TOP JARS

Built for bulk storage, the Screw-Top Jar is a pantry workhorse. Its massive size allows for safe storage of bulk cooking and baking staples, while the heavy-duty glass protects your ingredients and lets you clearly identify what's inside. In three big sizes, the Screw-Top Jar allows you to do away with paper and plastic containers in your pantry.

For preserves that are to be stored short term in the refrigerator or dry in the cupboard, the bright orange screw-top lid clearly identifies which of your canned goods have not been heat

treated. Made from flexible yet sturdy plastic that emulates Le Parfait's classic orange rings, these durable lids won't rust or corrode, and they can be washed and reused as needed.

The Screw-Top Jar is also designed to work with the Familia Wiss two-part cap and lid, allowing you to safely heat treat family-sized portions in the larger sizes.

The Screw-Top Jar comes standard with either the Familia Wiss two-part sealing cap and full lid or plastic cap. Additional plastic caps or Familia Wiss two-part cap and lid sold separately.

*Built to
stand up to
the big jobs*

The Screw-Top Jar's large sizes are good for short-term refrigerated storage of family-sized soups or sauces, full pickles and vegetables, whole tomatoes and fruits, kimchi and sauerkraut, or for longer storage of dry items that don't need refrigerating or canning, like pasta, rice or beans.

The jars can be used as decorative pieces for restaurants and the home as vases and candle features.

LE PARFAIT REPLACEMENT CAPS, GASKETS AND LIDS

Le Parfait offers a full line of replacement caps, gaskets and lids, which must be replaced for preservation after being heat treated.

The iconic orange gasket is made of natural material and should not be displayed or stored on jars intended for heat treating. Jars are shipped with a paper seal and the gaskets inside of the jar for their protection.

The Familia Wiss sealing cap ensures a tight seal the first time for long-term shelf life. Sealing caps cannot be reused and should be discarded once original seal is broken.

The Jam Jar's pen-and-ink

inspired screw-top lid reminds you that the contents are "Home Made." Once the heat seal has been broken, the screw-top should be used for short-term storage in the refrigerator.

For storage, the bright orange screw-top lid screws on and off easily. Made from flexible yet sturdy plastic, these durable lids won't rust or corrode, and they can be washed and reused.

Bright orange rubber caps are sold separately, allowing you to convert these drinking glasses to jam pots for quick preserves that need short-term storage and no heat treatment.

*Use your
glassware for
generations*

Caps, gaskets and lids come in multiple sizes. Please make sure to check the size of your existing glassware before ordering replacements.

To ensure a proper preservation, only use official Le Parfait replacement caps, gaskets and lids. Alternatives may not properly seal during heat treatments.
