Alfalfa Meal

Alfalfa Meal is an exceptional source of plant derived nutrients for promoting accelerated growth and plant development. It is highly recommended for roses as well as all other vegetables, herbs, flowers and shrubs. Our Alfalfa Meal is derived from sun cured, non-genetically modified alfalfa that is freshly milled to preserve the highest plant nutrient value.

GUARANTEED ANALYSIS

TOTAL NITROGEN (N)	2.5%
2.5% Water Insoluble Nitrogen	
AVAILABLE PHOSPHATE (P ₂ O ₅)	0.5%
SOLUBLE POTASH (K ₂ O)	2.5%

Derived from: Alfalfa Meal

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

APPLICATION RATES

3.5 cups \approx 1 lb; $\frac{1}{2}$ cup \approx 2 oz; 1 tbsp \approx 0.5 oz

Roses: For existing roses, apply 1/2-1 cup per plant in early Spring and thoroughly mix into the soil surface. For new roses, add 1/2-1 cup per hole, mix thoroughly into soil and water in well. Repeat application when blooms appear and again in Fall at half the recommended amount..

Vegetable Gardens & Flower Beds: To prepare new gardens, apply 5-10 lbs per 100 square feet and thoroughly mix into the top 3" of soil. For new transplants, add 1-2 tbsp per hole, mix into soil and water in well. To feed established plants, side dress $\frac{1}{2}$ cup once each month during the growing season to promote plant growth.

Containers: For new plantings, add 2-4 tbsp per gallon of soil and mix thoroughly **OR** add 5 lbs per cubic yard. For established plants, lightly mix 1-2 tbsp per gallon into the soil surface once each month during the growing season.

ABOUT DOWN TO EARTH

Down To Earth has been supplying premium quality natural and organic fertilizers and soil amendments to gardeners, farmers and manufacturers for over 30 years. Down To Earth offers a complete selection of all natural products for your home and garden. Just ask your retailer!

WHAT IS "N-P-K"?

NITROGEN (N) - Nitrogen is necessary for lush, green, leafy growth. An excess, however, will promote vegetative growth at the expense of fruit or flowers. Nitrogen is generally applied at higher concentrations in early growth stages. Use Down To Earth Bat Guano, Blood Meal or Feather Meal.

PHOSPHORUS (P) - Phosphorus will promote big, bright blooms and enhanced fruit production. Phosphorus is essential for fruiting, flowering, strong root growth and quality seed development. Use Down To Earth Fish Bone Meal or Seabird Guano.

POTASSIUM (K) - Potassium, or Potash, helps produce strong sturdy plants and quality fruit. Potassium naturally increases a plants resistance to all types of stress and is vital for cell growth and carbohydrate metabolism. Use Down To Earth Kelp Meal or Langbeinite.
