ALL NATURAL FERTILIZERS

NET WT 5 LB (2.27 kg)

**Greensand** is composed primarily of the blue-green siliceous mineral Glauconite, which is naturally occurring in marine sedimentary deposits. Greensand has been recommended as a soil amendment since the early 1700's due to its unique physical properties. Traditionally used to loosen heavy clay soil, Greensand is able to absorb up to one-third its weight in water to improve the moisture holding capacity of garden soils and potting mixes. Greensand is highly recommended for vegetables, fruits, herbs, lawns, ornamentals and all types of trees and shrubs.

#### **INGREDIENTS**

100% Greensand

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

#### **APPLICATION RATES**

**1.5 cups  $\approx$  1 lb;  $\frac{1}{4}$  cup  $\approx$  2.5 oz; 1 tbsp  $\approx$  0.5 oz**

**Vegetable Gardens & Flower Beds:** To prepare new gardens, apply 5-10 lbs per 100 square feet and thoroughly mix into the top 3" of garden soil in spring or fall. For new transplants, add 1 tbsp per hole, mix into soil and water in well.

**Containers:** For new plantings, add 1-2 tbsp per gallon of soil and mix thoroughly OR add 2.5-5 lbs per cubic yard. For established plants, lightly mix 1-2 tbsp per gallon into the soil surface every other month during the growing season.

**Trees, Shrubs & Vines:** Spread 1-2 lbs per 1" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well. For grapes, apply  $\frac{1}{2}$ -1 lb to the soil around each plant and thoroughly mix into soil. For new trees, prepare transplant hole and mix 1-2 lbs with the backfill soil. Use the amended soil to fill in around the new tree and water in well.
