

GUARANTEED ANALYSIS

Available Phosphate (P₂O₅) 12.0%
Calcium (Ca) 7.0%

Derived from: Bone Meal and Phosphoric Acid (for pH stabilization)

PRODUCT INFORMATION

Down To Earth Liquid Bone Meal is a readily available source of phosphorus and calcium designed to promote increased bud, flower, fruit, seed and vegetable production. This easy to use concentrated liquid formula provides essential nutrients vital for plant processes including metabolic functions, cell structure and flower formation. Use Liquid Bone Meal throughout the growing season to help prevent common nutrient deficiencies, improve flavor, quality and yield and to enhance bud, flower and fruit development.

DIRECTIONS FOR USE

Shake Well Before Using

DTE Liquid Bone Meal is most effective as a soil drench and is designed for plants grown in garden soils, potting soils or soilless media. For best results, first mix the recommended quantity of Liquid Bone Meal in a small volume of water to create a concentrated suspension. Add the total remaining volume of water necessary for application, mix thoroughly to create a uniform solution and then apply as directed.

Vegetable Gardens & Flower Beds: For early season applications, use 1-2 Tbsp per gallon of water and apply around the base of established plants. For mid-to-late season applications, including use during blooming, fruiting and flowering stages, use 4-8 Tbsp (2-4 oz) per gallon of water. Apply weekly throughout the growing season or as needed.

Trees, Shrubs & Vines: For early season applications, use 1-2 Tbsp per gallon of water and apply around the base of established plants. For mid-to-late season applications, including use during blooming, fruiting and flowering stages, use 4-8 Tbsp (2-4 oz) per gallon of water. Apply weekly throughout the growing season or as needed.

Containers: For early season applications, use 1-2 Tbsp per gallon of water and apply around the base of established plants. For mid-to-late season applications, including use during blooming, fruiting and flowering stages, use 4-8 Tbsp (2-4 oz) per gallon of water. Apply weekly throughout the growing season or as needed.

Houseplants: Use 2 Tbsp (1 oz) per gallon of water. Apply solution around the base of plants. Repeat application monthly or as needed.
