

Coconut Coir Fiber

A shredded coir fiber that makes an excellent addition to seed starting mixes and is a superior alternative to peat moss in all potting mediums. Coconut Coir Fiber is an environmentally friendly, renewable resource that is easy to use and completely biodegradable.

- All natural, eco-friendly peat alternative made from coconut husks
- Excellent amendment for all types of potting media from seed starting to large containers
- Also ideal for worm bins, compost piles, hanging baskets and garden soils
- High water holding capacity – up to 10 times its weight
- Promotes optimum aeration and drainage
- Neutral to slightly acidic pH 5.5-6.5

DIRECTIONS FOR USE:

One compressed brick will yield approximately 6-8 quarts of ready to use coir fiber.

Coconut Coir Fiber performs best when combined with other soil amendments such as compost, bark, perlite, etc.
